Needs Assessment Follow Up & Next Steps

The group agreed that much more time would be needed to adequately respond to the needs/improvements discovered through the survey assessment for each of the CCSPP school sites. Based on the time and focus needed, an extra date for Community Schools Advisory Council was added (June 22nd) and meeting times were extended to have start time begin at 9 am.

Feedback from the group also demonstrated that there may be a need to not move to quarterly meetings until further notice.

Further meetings will be focused on completing site needs assessments and how to implement actionable items for each Community School site.

Thought Exchange

A question was presented to the group: What are the most important things to focus on as we continue our work to support all students? This was answered by using Thought Exchange with all participants. There was an opportunity (on the program) to vote on which items other attendees found crucial or most important.

Thought Exchange was conducted again. Outcomes will be shared at the next meeting.
